SUMMARY

I'm a full-stack developer passionate about creating clean, accessible, and high-performing digital experiences. I enjoy blending thoughtful design with solid engineering to build products that feel intuitive, reliable, and enjoyable to use.

I'm currently working at Zomac Digital, where I contribute to building and improving modern digital solutions. I focus on delivering seamless user experiences while ensuring every part of a product — from frontend to backend — is crafted with care and precision.

Throughout my journey, I've worked in collaborative environments that have strengthened my approach to problem-solving, product thinking, and user-centered development. I value clean architecture, clarity, and building products that genuinely help people.

EXPERIENCE

2025 — PRESENT
SOFTWARE ENGENEER • ZOMAC DIGITAL
Contributing to the development and growth of digital products at Zomac Digital. My role involves helping shape the technical direction of projects, ensuring high-quality engineering standards, and working hands-on across both frontend and backend to deliver polished, reliable, and scalable solutions ready for market.

SKILS

 Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React, Next.js, Angular, Tailwind CSS, Laravel, ReactNative,Flutter
Backend: Node.js, PHP, Python,
Databases: SQL, PostgreSQL, MongoDB, Superbase
Cloud & Tools: Supabase, AWS (basic), Git, GitHub, REST APIs, Agile, CI/CD

PROJECTS

1. **Habinest Mobile App**
   -Built a Functional mobile aplication enabling users for properties, view detailed listings, book stays, manage reservations, and manage hosts. Intergrated user Authentication,dynamic property filters,

image galleries,review and rating system, and booking management.Focused on clean UX desgn, performance optimization, and scalable architecture

2. **L3X Network - Founding Product Design**
   - L3X Network is a Layer 3 interoperability blockchain designed to provide institutions, developers, and users with secure, compliant, and efficient access to decentralized finance (DeFi) markets. My role involved founding and leading the design team, mapping UX, and designing the protocol's Landing Page and Interfaces for the Bridge, Trading, Swap, and Staking platforms.

3. **Swoop Exchange – Landing page**
   - Swoop's landing page highlights the platform's use cases and solutions. Swoop Exchange is a Meta-DEX Aggregator that automatically sources, ranks and routes quotes from the best DEX Aggregators and Bridges, ensuring the best prices for on-chain and cross-chain swaps. Swoop Exchange has achieved millions in USD volume and currently has around 4000 monthly users with 0 paid marketing.

4. Monecuer Company Website ([TAP TO VIEW](#))
   - Designed and developed a professional, responsive website for a company to showcase services, improve user engagement, and enhance online presence.

5. **Wedding Planner** ([TAP TO VIEW](#))
   - An all-in-one platform designed to simplify wedding planning, from guest list management and budget tracking to vendor coordination

6. **Snapevent** ([TAP TO VIEW](#))
   - A dynamic event management platform for seamless planning, promotion, and execution of events

7. **Payslip Generator** ([TAP TO VIEW](#))
   - An app to generate professional payslips instantly from employee data. Export as PDF or email directly

8. **Webscraper** ([TAP TO VIEW](#))
   - Fetch, parse, and analyze website data automatically for reporting and research purposes
