PROFESSIONAL SUMMARY

I'm a mobile app and web developer passionate about building reliable, user-friendly, and high-performing digital solutions. My main focus is creating mobile applications using Flutter and modern web systems using React.

I have worked at Zomac Digital, where I developed real-world projects, mainly focusing on mobile applications and web-based systems for clients.

Outside of my professional work, I have independently built 9 business systems that are currently being used by 9 different companies, including two in South Africa. This hands-on experience has strengthened my problem-solving skills and ability to deliver practical, production-ready solutions.

I enjoy solving real-world problems through technology, continuously improving my skills, and building products that genuinely help people and businesses grow.

EXPERIENCE

Software Engineer

Sep 2025 — Present

Zomac Digital

- Contributing to the development and growth of digital products at Zomac Digital.
- Helping shape the technical direction of projects, ensuring high-quality engineering standards.
- Working hands-on across both frontend and backend to deliver polished, reliable, and scalable solutions ready for market.

Youth Coding Volunteer • Primary Schools

Jan 2025 — Sep 2025

Gilingam Primary school

- I volunteered to help primary school children in the Dzivarasekwa area by teaching them basic ICT skills and Scratch programming. These children had no access to laptops or other resources to learn technology. My goal was to provide them with foundational knowledge that could spark their interest in tech and open up future opportunities

PROJECTS

Habinest Mobile App

- Built a functional mobile application enabling users to find properties, view detailed listings, book stays, manage reservations, and manage hosts.
- Integrated user authentication, dynamic property filters, image galleries, review and rating system, and booking management.
- Focused on clean UX design, performance optimization, and scalable architecture.

Quality Import Cars

- Created a car sale website for a South African company.

Monecuer Company Website

- Designed and developed a professional, responsive website for a company to showcase services, improve user engagement, and enhance online presence.

Payslip Generator

- An app to generate professional payslips instantly from employee data.
- Export as PDF or email directly.

Webscraper

- Fetch, parse, and analyze website data automatically for reporting and research purposes.
